DETAILED ACTION

Election/Restrictions

Claims 1 and 17-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6. Examiner further withdraws Claims 2, 3, and 5 as being drawn to Figure 18, a non-elected species. Claims 2, 3, and 5 clearly positively recite limitations of the dispenser (330) and dispensing controller (332), which are both specific to Figure 18.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show reference number 158 in Figure 5 as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract

Art Unit: 3763

on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zanzucchi et al (US 5,585,069) and Zanzucchi et al (US 5,846,396). Both patents disclose an apparatus comprising a dispensing controller and a dispenser operated by said dispensing controller characterized by said dispenser comprising a MEMS pump.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Reed et al (US 6,197,013). Reed discloses an apparatus comprising a dispensing controller and a dispenser operated by said dispensing controller characterized by said dispenser comprising a MEMS pump.
